1 Introduction

PLD Türkiye is part of the Ağustos family: Ağustos Teknoloji, Pataraz, PLD Türkiye, IESDesk, SpecQuick, Emre Güneş, Banu Uçak and Selim Güneş. Every brand shares one symbol, the Laz Güneşi, an 18-blade sun. Ağustos alone uses red. The other brands use black or white, and their wordmark tells them apart.

Our design direction is İskandivvian: Scandinavian restraint filtered through Mediterranean warmth. In practice, that means white paper, few colours, clear type and plain language. Every element must be useful. Nothing is there for decoration.

This guide covers the basics: the logo, colour, type and the right file for each job. Use it when you make anything that carries the PLD Türkiye name.

The family

ağustos	Ağustos Teknoloji	`agustos.com`
pataraz	Pataraz	`pataraz.com`
pld türkiye	PLD Türkiye	`pldturkiye.com`
iesdesk	IESDesk	`iesdesk.com`
specquick	SpecQuick	`specquick.com`
emre güneş	Emre Güneş	`memregunes.com`
banu uçak	Banu Uçak	`banuucak.com`
selim güneş	Selim Güneş	`selimgunes.com`

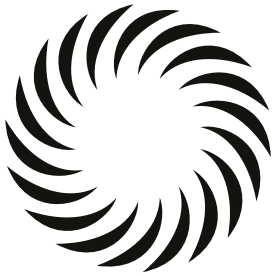

2 In every medium

A website, a datasheet and a LinkedIn post cannot look the same, but they must read as one brand. These rules hold everywhere. Test a new piece by covering its logo: the reader must still know whose it is.

Rule	Website	Datasheet	LinkedIn
One symbol and a lowercase wordmark in the identity ink. Never redrawn, never with a tagline.	The site lockup in the top menu and the footer.	The lockup at the top left of every sheet.	The lockup at the foot of every post image; the avatar is the symbol tile.
Red is identity and signal only: the Ağustos logo, and on screen the link rule, focus and one marker stroke. Never a fill, a button or text colour.	The logo, the 2px link and menu rule, keyboard focus and one highlighter stroke per page. Buttons are black.	No red, except the Ağustos logo.	No red, except the Ağustos logo and at most one highlighter stroke in the headline.
Three faces on one scale: Inter Tight for headings, Inter for text, JetBrains Mono for data. Headings are thin and in sentence case.	The type table (recipes.typeRoles) through the kit classes.	The same faces and weights at the print sizes of recipes.document.	The headline takes the H1 role, the deck the deck role.
Spec values are data: mono figures with the unit, the label in the display face.	type-spec on the spec table or list.	Every spec row.	Any figure that appears in a post image.
White paper and generous space. One title opens the page and nothing sits above it.	White paper, the section spacing, one closing band.	White A4, wide margins, one product title.	A white field; the headline is the only large text.
Plain, short, active words. No all-caps labels, no label above a title, no inflated claims.	Sentence case in headings, menus and buttons.	Sentence case labels; Turkish with lang=tr.	One idea per post image, in sentence case.
Text clears 4.5:1 contrast and graphics 3:1 (WCAG 2.2 AA).	The states table; the build refuses a failing pair.	Ink and ink-soft on white only.	Ink on white only; no text on a photograph.

3 The symbol

The Laz Güneşi is an 18-blade sun. Every brand in the family uses this one symbol. Use the supplied artwork only. Never redraw, simplify or rearrange the blades.

Colour of the symbol

In the PLD Türkiye logo, the symbol is off-black, like the wordmark. On a dark background, it is white. As a browser tab icon, the symbol stands alone on a transparent background, off-black. The Apple touch icon and the PWA icons keep a white square (2026-10-15).

64px

32px

16px, smallest

4 The logo

The logo is the symbol with the wordmark "pld türkiye", set in Inter Tight at weight 650, always lowercase. The two parts are one unit. Do not move them apart or use the wordmark without the symbol.

Three versions

Pick the version by the background. There is no fourth version.

Positive
Default. Light backgrounds, about 90% of uses.

Negative
On the identity colour, dark colours and photographs.

Mono
One ink only: stamps, engraving, single-colour print.

5 Clear space and minimum size

Keep an empty area around the logo. Its width, x, is equal to the height of the symbol. No text, image or page edge can go into this area.

Minimum size

Below these heights, the wordmark is hard to read. For smaller spaces, use the symbol alone.

pld türkiye

On screen: 24px tall

pld türkiye

In print: 8mm tall

6 Logo misuse

The logo works only when it looks the same everywhere. These are the most common mistakes.

Don't stretch or squash the logo.

Don't recolour the logo.

Don't rotate the logo.

Don't set the wordmark in capitals.

Don't add a tagline or other text.

Don't add shadows or effects.

7 Colour

The PLD Türkiye identity colour is off-black, #15130F. Red belongs to Ağustos. Never make the PLD Türkiye logo red.

Identity colour
HEX #15130F
RGB 21 19 15

The six colours

Every house brand uses the same six colours. White is the paper. In layouts, red is a signal, not a fill.

White
HEX #FFFFFF
RGB 255 255 255
Paper for every page and screen.

Pale red
HEX #FDF5F5
RGB 253 245 245
The one closing band of a page.

Light gray
HEX #EBEBEB
RGB 235 235 235
Quiet surfaces, panels, and hover and pressed fills.

Dark gray
HEX #404040
RGB 64 64 64
Secondary text.

Off-black
HEX #15130F
RGB 21 19 15
Body text, headings and buttons.

Red
HEX #CF142A
RGB 207 20 42
Identity and signal: the Ağustos logo, the 2px link rule, keyboard focus, one highlighter stroke. Never a button.

For print, match these colours against a printer proof. CMYK and Pantone values are not registered yet. Do not convert the screen values yourself.

8 Colour in use

On screens, colour follows the state of each element. Every pair below clears the WCAG 2.2 AA floor: 4.5:1 for text, 3:1 for borders, logos and the focus ring. The same pairs hold in the light and the dark theme.

Red is identity and signal, never action. Buttons are black in every brand. Red marks the Ağustos logo, the 2px link rule, the current menu item, keyboard focus and one highlighter stroke.

Hover. On light paper a link turns red. On dark paper red text is too faint (3.35:1), so the text dims and the red rule stays. The Ağustos logo turns off-black (white on dark); every other logo turns red.

Pressed and disabled. A pressed button moves 1px down. A disabled control turns gray and does not react.

Dark theme. Every page starts light. The user may switch to dark; the device never chooses. The footer and the closing band turn dark with the page. Print is always light.

Element	State	Light	Dark
Body text	rest	Aa 18.55	Aa 18.55
Secondary text	rest	Aa 10.37	Aa 4.95
Content link (2px red rule)	rest	Aa 18.55	Aa 18.55

Danger badge	rest	Aa 6.57	Aa 7.76
Info badge	rest	Aa 8.39	Aa 8.78
Code block	rest	Aa 14.61	Aa 10.37
Disabled button or field	disabled	Aa exempt	Aa exempt

9 Typography

Three typefaces, all free and open source. Headings are thin and large; weight, not colour, sets the order. Write in sentence case. Sizes follow one scale: the 16.5px body times 1.272 per step, so every second step is the golden ratio.

Hero, Inter Tight 300
89px on screen. One per page.

Light

H1, Inter Tight 300
55px. Page titles.

Right light

H2, Inter Tight 400
43px. Sections.

Product range

H3, Inter Tight 500
21px. Cards and subsections.

Specifications

Body, Inter 400
16.5px, line height 1.65, about 75 characters a line at most.

Body text is set at a comfortable size with generous line spacing.

Small print, Inter 400
13px. Footnotes and captions.

Prices exclude VAT.

Spec values, JetBrains Mono
Data with units, on the web, the datasheet and LinkedIn. Labels stay in Inter Tight.

`PX22 · 160 W · 4200 lm`

Wordmark, Inter Tight 650
The logo only. Never for text.

pld türkiye

Four text weights: 300, 400, 500 and 600. Every face supports Turkish: ağustos · İstanbul · ışık · Güneş. Documents and slides use the same faces at the sizes their templates carry.

10 Emphasis

Emphasis is rationed. Each tool has one job, and they are never combined. When everything stands out, nothing does.

Red highlighter

Light for architecture

Once per page, on one to four words of the main headline. The sentence must read the same without it.
Never: body text, links, buttons, numbers, product screens, or a second stroke.

Bold (600)

Delivery takes **four weeks** from the order.

A fact the reader scans for: a value, a deadline, a term at its first use. At most once per paragraph.
Never: whole sentences, headings inside running text, or next to the highlighter.

Italic

The symbol is the *Laz Güneşi*, shown in *Lighting Journal*.

Names of publications and projects, foreign terms, and quoted phrases.
Never: to stress a word, in headings, or in buttons.

Underline

Read the **installation guide**.

Links only. On screens it is a 2px red rule.
Never: for emphasis, in print or on screen.

Colour and capitals

Text stays off-black or dark gray. Headings and labels are in sentence case.
Never: coloured text, all-capital labels, or small labels above a heading.

Do

Light for architecture

Our fittings ship in **four weeks**. See the **product range**.

Don't

11 Which file to use

Use the finished files. Do not redraw the logo or copy it from a website or a PDF. Every file below is in the PLD Türkiye brand kit, in the folder named in the right column.

Logo for a website or app	`lockup/pld-lockup__positive.svg`
Logo on a dark or photo background	`lockup/pld-lockup__negative.svg`
Logo in one ink	`lockup/pld-lockup__mono.svg`
Logo for print	`lockup/pld-lockup__positive.pdf`
Logo for slides or social posts	`lockup/pld-lockup__positive.png`
Favicon (transparent tab icon)	`favicon/favicon.svg`
Profile picture	`social/pld-avatar-1000.png`
Link preview image	`social/pld-og.png`
Colour swatches	`swatches/pld.ase (Adobe), pld.clr (Apple)`
Presentation	`office/pld-template.pptx`
Letter or document	`office/pld-letterhead.docx, pld-document-template.docx`
Email signature	`email/pld-signature.html`

Fonts: Inter Tight, Inter and JetBrains Mono, with their licences, are in the fonts folder of the kit.
