

Pataraz

The logo

The mark is the Laz Güneşi symbol locked up with the wordmark. Three expressions cover every surface. Use the positive form first — it works on cream and dark backgrounds alike.

CLEAR SPACE & MINIMUM SIZE

Keep clear space around the lockup equal to the symbol height. Never place type or edges inside it. Minimum size: 24px tall on screen, 8mm in print, so the wordmark stays legible.

Colour

One brand colour, used as a signal — on links, rules, and accents — never as flat decoration. Everything else is the cream substrate and the ink neutrals.

DO & DON'T

- **Do** set the wordmark in Inter Tight Semibold, lowercase, in the brand colour.
- **Don't** recolour the symbol, stretch the lockup, or add a tagline beside it.
- **Do** keep the brand colour for emphasis; **don't** fill large areas with it except the negative lockup tile.

Typography

Two families, one skeleton. Inter Tight for display and the wordmark; Inter for body. JetBrains Mono for code and data.

The Turkish locale is first-class: **ağustos**, **İstanbul**, **ışık** — the dotted/dotless i and the ğ breve all render correctly.
