1 Introduction

Ağustos Teknoloji is the parent company of Pataraz, PLD Türkiye, IESDesk, SpecQuick and Emre Güneş. Every brand shares one symbol, the Laz Güneşi, an 18-blade sun. Ağustos alone uses red. The other brands use black or white, and their wordmark tells them apart.

Our design direction is İskandivvian: Scandinavian restraint filtered through Mediterranean warmth. In practice, that means white paper, few colours, clear type and plain language. Every element must be useful. Nothing is there for decoration.

This guide covers the basics: the logo, colour, type and the right file for each job. Use it when you make anything that carries the Ağustos Teknoloji name.

The family

ağustos	Ağustos Teknoloji	agustos.com
pataraz	Pataraz	pataraz.com
pld türkiye	PLD Türkiye	pldturkiye.com
iesdesk	IESDesk	iesdesk.com
specquick	SpecQuick	specquick.com
emre güneş	Emre Güneş	memregunes.com

2 The symbol

The Laz Güneşi is an 18-blade sun. Every brand in the family uses this one symbol. Use the supplied artwork only. Never redraw, simplify or rearrange the blades.

Colour of the symbol

In the Ağustos Teknoloji logo, the symbol is red, like the wordmark. On a dark background, it is white. As a favicon or app icon, the symbol stands alone, red on a white square tile.

64px

32px

16px, smallest

3 The logo

The logo is the symbol with the wordmark "ağustos", set in Inter Tight at weight 650, always lowercase. The two parts are one unit. Do not move them apart or use the wordmark without the symbol.

Three versions

Pick the version by the background. There is no fourth version.

Positive

Default. Light backgrounds, about 90% of uses.

Negative

On the identity colour, dark colours and photographs.

Mono

One ink only: stamps, engraving, single-colour print.

4 Clear space and minimum size

Keep an empty area around the logo. Its width, x , is equal to the height of the symbol.
No text, image or page edge can go into this area.

Minimum size

Below these heights, the wordmark is hard to read. For smaller spaces, use the symbol alone.

On screen: 24px tall

In print: 8mm tall

5 Logo misuse

The logo works only when it looks the same everywhere. These are the most common mistakes.

Don't stretch or squash the logo.

Don't recolour the logo.

Don't rotate the logo.

Don't set the wordmark in capitals.

Don't add a tagline or other text.

Don't add shadows or effects.

6 Colour

The Ağustos Teknoloji identity colour is red, #CF142A. Only the Ağustos logo is red. Red fills a surface in one place only: the identity tile behind the negative logo.

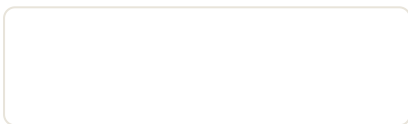

Identity colour

HEX #CF142A

RGB 207 20 42

The six colours

Every house brand uses the same six colours. White is the paper. In layouts, red is a signal, not a fill.

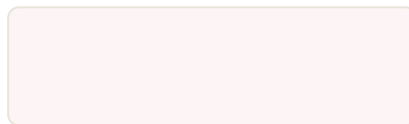

White

HEX #FFFFFF

RGB 255 255 255

Paper for every page and screen.

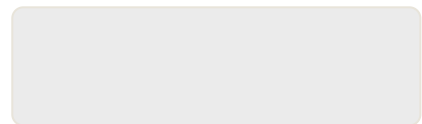

Cream

HEX #FDF5F5

RGB 253 245 245

Full-width callout and closing bands only.

Light gray

HEX #EBEBEB

RGB 235 235 235

Quiet surfaces and panels.

Dark gray

HEX #404040

RGB 64 64 64

Secondary text.

Off-black

HEX #15130F

RGB 21 19 15

Body text and headings.

Red

HEX #CF142A

RGB 207 20 42

Signal: 2px link rule, current menu item, keyboard focus.

For print, match these colours against a printer proof. CMYK and Pantone values are not registered yet. Do not convert the screen values yourself.

7 Typography

Three typefaces, all free and open source. Install them before you edit any template.
Write headings in sentence case. Do not use all-capital labels.

Inter Tight 650

Wordmark, display, headings

Light for architecture

Inter Tight 600

Subheadings

Product range and specifications

Inter 400

Body text, captions, tables

Body text is set at a comfortable size with generous line spacing. Keep lines short enough to read in one pass.

JetBrains Mono

Codes, file names, data

PX22-3000K-24D • 1200 lm

Turkish

Every face supports it

ağustos • İstanbul • ışık • Güneş

8 Which file to use

Use the finished files. Do not redraw the logo or copy it from a website or a PDF. Every file below is in the Ağustos Teknoloji brand kit, in the folder named in the right column.

Logo for a website or app	lockup/agustos-lockup__positive.svg
Logo on a dark or photo background	lockup/agustos-lockup__negative.svg
Logo in one ink	lockup/agustos-lockup__mono.svg
Logo for print	lockup/agustos-lockup__positive.pdf
Logo for slides or social posts	lockup/agustos-lockup__positive.png
Favicon or app icon (symbol on a white tile)	favicon/favicon.svg
Profile picture	social/agustos-avatar-1000.png
Link preview image	social/agustos-og.png
Colour swatches	swatches/agustos.ase (Adobe), agustos.clr (Apple)
Presentation	office/agustos-template.pptx
Letter or document	office/agustos-letterhead.docx, agustos-document-template.docx
Email signature	email/agustos-signature.html

Fonts: Inter Tight, Inter and JetBrains Mono, with their licences, are in the fonts folder of the kit.
